

Let's Focus on Taking Great Care of Your Hospice

In the complicated world of hospice, ProCare Rx HospiceCare (PHC) wants to make your life simpler. We know you are bombarded with ever-changing regulations and reporting requirements forcing disruptive shifts in your day-to-day operations and causing your staff to do more with less. Rather than give your program another process to implement, our goal is to become an integral part of the operations you already have in place.

ProCare Rx HospiceCare's ability to support our partners in providing quality, convenient, and cost-effective solutions for PBM is centered around three simple solutions:

1

INTEGRATED TECHNOLOGY

PHC has the ability to interface with any EMR, taking duplicate data entry out of the picture, allowing your staff more time for important daily operations and patient-care issues.

Quality

2

CUSTOMIZED PLANS

PHC offers solutions specific to your program as identified by you, and has the ability to adapt quickly to allow growth and change within your operation. This includes integration of several different program locations.

Convenience

3

COMPREHENSIVE REPORTING

Our unique and proprietary model of pharmaceutical care is our secret to mutual success with our partners.

We know hospice and we can provide what you want and need to ensure you are in control of spending, while providing the best patient care possible.

Control

Onsite Claims Processing

ProCare Rx HospiceCare does not contract with a third party to process your claims. We pass that savings on to you and use the data to help you remain in constant control of your medication spend.

Compliance Support

ProCare Rx HospiceCare will ensure your program's quality and compliance reporting with our QAPI support.

Expertise, Quality Services and Support... One Hospice Patient at a Time

FOCUSING ON MEDICATION UTILIZATION

We have been managing quality medication cost-optimization programs for over 25 years through our proprietary, pharmacy claims-processing system. As your partner, we focus on helping you prioritize cost effective, non-compromising patient care, offering convenient access to essential clinical tools and drug information database.

ProCare Rx HospiceCare provides the industry's gold standard of hospice pharmacy solutions, from convenient medication ordering and delivery, to cost savings recommendations based on your data. Giving you ultimate control over your program.

Our pharmacy benefit program is specifically designed to address the full scope of medication management services for the hospice industry.
